Dimock Health Consultation

ATSDR forwarded a draft of its Health Consultation for the Dimock Groundwater Site to EPA, Region III last week for review and comment. The consultation was performed in response to EPA's request for a public health evaluation of current exposures for Dimock residents based on EPA's 2012 data set. A toxicologist in the Hazardous Sites Cleanup Program is reviewing the report. When this review is complete I will be briefed on its contents, and will get it to others in HQ.
